**T**HIS INSTITUTION comprises two departments, the College and the Academic.

## COLLEGE.

This department comprises three courses of study, THE CLASSICAL, THE SCIENTIFIC, and THE PHILOSOPHICAL.

### THE CLASSICAL COURSE.

The studies of this course include all the branches usual in an American college, and require four years for their completion. Candidates for admission into the Freshman class of this course must be able to sustain an examination on the studies of the Sub-Freshman class of the Academic Department.

The studies of the several classes are as follows:

#### FRESHMAN CLASS.

Latin Prose Composition, Cicero's Orations, Livy, Greek Grammar, Xenophon's Anabasis and Memorabilia, Algebra (completed), Plane Geometry, Classical Antiquities, Outlines of History, Rhetoric.

#### SOPHOMORE CLASS.

Odes of Horace, Cicero de Amicitia et de Senectute, Greek Historians, Latin and Greek Prose Composition, Solid, Spherical and Analytical Geometry, Conic Sections, Plane and Spherical Trigonometry, Mensuration, Physics (to Acoustics), English Literature, Anatomy, Zoology.

#### JUNIOR CLASS.

Mental Philosophy, the Differential and the Integral Calculus, Satires of Horace, Germania and Agricola of Tacitus, Prometheus and Agamemnon of Æschylus, Homer's Iliad, Physics (completed), Meteorology, Chemistry (to Nitrogen), Mechanics, Astronomical Geography.

#### SENIOR CLASS.

Evidences of Christianity, Natural Theology, Moral Philosophy, Political Economy, Chemistry (completed), Astronomy, Lectures on Mineralogy, Geology, Botany, Logic, Plautus or Terence, Juvenal, Demosthenes on the Crown, Ajax of Sophocles.

The study of the German Language may be pursued at any time by any member of the institution.

Careful attention will be given during the whole course to exercises in Declamation and English Composition.

Students are earnestly advised to begin their studies with a view to completing the Classical Course, as this course affords advantages greatly superior to those of either of the others.

---

## THE SCIENTIFIC COURSE.

The distinctive features of this course are the study of Mathematics and Physical Sciences, Political and Mental Sciences, and the English and Latin Languages.

In lieu of the usual three years of 39 weeks each, the course comprises four years of 30 weeks each. We call the special attention of all who desire an education preparatory for any vocation, save the learned professions, to our scientific course. It will be seen that the time is so arranged as to enable any earnest young man to complete the studies of this course without serious interference with his engaging in profitable employment during the spring and summer months. For admission into this course the same advancement is required as that which would enable the candidate to enter the Freshman class of the Classical course, save that no Greek is required, and that but one year of preparatory study of Latin is requisite. In this course Latin is completed in three years, and Greek is optional.

The studies of the several classes are as follows:

### FRESHMAN CLASS.

Algebra (completed), Plane Geometry, Outlines of History, Rhetoric, Classical Antiquities, Ancient Geography, Latin Grammar, Cæsar and Virgil.

### SOPHOMORE CLASS.

Solid, Spherical, and Analytical Geometry, Conic Sections, Plane and Spherical Trigonometry, Mensuration, Physics (to Acoustics), English Literature, Anatomy, Zoology, Latin Prose Composition, Cicero's Oration, Livy.

### JUNIOR CLASS.

Mental Philosophy, the Differential and the Integral Calculus, Physics (completed), Meteorology, Chemistry (to Nitrogen), Mechanics, Astronomical Geography.

### SENIOR CLASS.

Evidences of Christianity, Natural Theology, Moral Philosophy, Political Economy, Logic, Chemistry (completed), Astronomy, Geology, Lectures on Mineralogy, Botany, Civil Engineering.

## PHILOSOPHICAL COURSE.

This course continues through the thirty-five weeks of the Classical course, and comprises all the studies of the Scientific course with such additional studies as may be assigned during the remaining five weeks of the scholastic year. These five closing weeks will be devoted to such studies as the history, structure and laws of the English language, Criticism, Blair's Rhetoric, International and Commercial Law, Instrumental Astronomy, Practical Surveying, &c. The Latin is continued throughout this entire course.

## ACADEMIC DEPARTMENT.

The course of instruction in this department is designed to afford thorough preparation for college, for business, and for the profession of teaching, and comprehends two classes. Students will be admitted to that grade for which they are qualified.

### PREPARATORY CLASS.

In this class, and before allowed to enter upon the studies of the next, the student is required to give conclusive evidence of thoroughness in the ordinary English branches taught in public schools; also to pursue the study of the Latin Grammar and Reader.

### SUB-FRESHMAN CLASS.

Arithmetic (completed), Elementary Algebra, Latin Grammar, Cæsar and Virgil, Greek Grammar and Reader, Ancient Geography, and the first six propositions in Geometry. This limited exercise in Geometry is assigned as a test of mental discipline; and upon it all candidates for admission into the Freshman class must be prepared to pass a rigid examination.

Students preparing for business or for teaching may pursue any of the following additional studies: Book-Keeping, Philosophy, Physiology Zoology and Botany.

## MUSIC.

In this department instruction is given on the Piano, Organ, Band and Orchestral instruments. Vocal music is taught from its rudiments to its most intricate combinations. Instruction is also given in Thorough Bass and Musical Composition. A full set of Helicon horns of superior quality has been procured for purposes of instruction. The College furnishes its own music on public occasions. Two first-class pianos are in the college for the use of those studying Music.

## DEGREES AND DIPLOMAS.

Students completing the Classical Course, receive the Degree of Bachelor of Arts; those completing the Scientific Course, the Degree of Bachelor of Science; and those completing the Philosophical Course, the Degree of Bachelor of Philosophy. Ladies are admitted to any one of the three courses, and on completing the same, with the omission of Greek and Calculus, (which with them are optional,) receive the corresponding degree. In lieu of such omission, they are expected to pursue the study of Music or some of the fine arts. The Degree of Master of Arts, of Science, or of Philosophy, may be conferred, in course, upon every Bachelor of Arts, of Science, or of Philosophy, of three years' standing, who, during the interval, has sustained a good moral character, and has pursued professional or scientific studies.

## LITERARY SOCIETIES.

Two Literary Societies, the Galileo and the Cicero, have been organized in the institution. These hold their sessions on Wednesday afternoon of each week, and, to those connected with them, afford, besides access to their libraries, valuable aid in composition, debate, elocution, parliamentary rules, &c. They provide a course of public lectures, each winter, from which much benefit may be derived. All members of the institution, of sufficient age, are expected to unite with one or the other of these associations.

## LIBRARIES.

A valuable library, of about three thousand volumes has already been secured for the institution. To this, under proper regulations, all students have access.

The Literary Societies of the institution have also each made a very creditable beginning in the formation of a library. These are for the special use of those connected with the associations.

## APPARATUS AND CABINET.

The college has in its possession a very respectable collection of philosophical apparatus, with which the principles of physical science can be properly and fully illustrated. The chemical laboratory has also been replenished with the addition of some new apparatus, so that students can have the benefit of all the experiments necessary for the elucidation of subjects connected with chemical science. A very fine cabinet of rare and choice minerals has also been procured and placed in the College for the use of students in the department of Mineralogy. Efforts are also being made to collect a cabinet of Geological and Archæological specimens. Contributions to this object, either in money or select specimens, are earnestly solicited.

## THE BELLES-LETTRES PRIZE MEDAL.

A friend of the College has donated a sum of money, the interest of which is devoted annually to the purchase of a medal for that member of the Junior Class who shall present the best essay upon a given subject. The subject this year was Grey's Elegy; and the successful competitor is Mr. J. J. Williams, of Carthage.

## GOVERNMENT.

The government in the institution is not arbitrary, but firm, prompt and efficient. Each student, at his matriculation, is required to pledge himself to conform to all the rules and regulations of the institution, and to attend faithfully to all duties imposed upon him for his advancement.

Repeated absence, persistent tardiness, intemperance, profanity, indifference, and disrespectful conduct, being altogether incompatible with the *business* to be transacted in the institution, will result in the peremptory dismissal of the offender.

## DEVOTIONAL EXERCISES.

The exercises of each day are opened with singing, reading of the Scriptures and prayer, at which all are required to be present. A Students' Christian Association has been organized, which holds a weekly meeting for devotional exercises.

All students are required to attend public worship at least once on each Sabbath. Parents are requested to designate to the faculty, in writing, the church of their choice. In the absence of such designation, students are required to worship with the Faculty.

## BOARD.

It is the desire of all concerned in the management of this institution to furnish all the advantages and facilities of a first-class College, and to do this at rates that will bring a full collegiate education within the reach of even the most indigent young gentlemen and ladies. To secure this end all the items of expense are reduced to the lowest possible degree. Good, substantial board is furnished *at cost*, which, during the past year, was an average of \$1.85 per week. The culinary department is under the efficient control of experienced matrons. Large and convenient buildings have been erected, in which are dining halls and rooms for the occupancy of students. Board and rooms in these are furnished at from \$2.00 to \$3.00 per week. Board with furnished rooms in private families, \$3.00.

TERMS AND VACATIONS.

The next Scholastic year of the College, and of the Sub-Freshman Class of the Academic Department, will begin on Tuesday, the 5th day of September, 1876; and will close on the 3d day of May, 1877. The length of the year is 35 weeks, divided, by New Year's day, into two terms of  $17\frac{1}{2}$  weeks each. The year of the Academic Department, except the Sub-Freshman Class, and of the Scientific Course, begins Sept. 5, 1876, and continues 30 weeks, closing March 30, 1877. The year is uninterrupted by vacations, save only these holidays: Thanksgiving, Christmas, and New Year's day. We are moved to the adoption of this plan by many considerations, among which are the following: Because the three weeks lost in Christmas and spring vacations are, for manifest reasons, attended with no physical benefits; because these vacations, whether students go home or remain, are an expensive luxury; because they often produce, through previous excitement and subsequent semi-demoralization, evil results even in term; because the time spent in these vacations cannot be turned to account by the many students to whom "*time is money*," but saved here and added to a long summer vacation, these weeks are very valuable. For these and other reasons we adopt this arrangement, much as we are disposed to regard the injunction against the "removal of the landmarks."

The Scholastic year is followed by a vacation of 17 (in the Scientific Course 22) Spring and Summer weeks, affording the student time enough to earn the means with which to carry him through the next year. The year is shortened somewhat for the protection of the health of the student. The standard of scholarship for graduation is not thereby lowered, for we are convinced that students achieve as much in 35 week of continuous labor as in 39 weeks broken by the distractions of vacations and the dissipations of holidays. With this economy in the division of the student's time and in the matter of his expenses, we confidently believe that we bring a thorough classical education within the reach of every earnest young man and woman.

It is hoped, that, under these circumstances, students will endeavor to commence with the beginning of the year and to continue regularly until its close. Those so beginning will be *certain* to find satisfactory classification. Students may enter at any time and take their places in classes already formed; but the best results are secured by those who commence at the opening of the year.

## LOCATION.

Carthage is a pleasant town of about 2500 inhabitants, the county seat of Hancock County, closely connected by railroads with Quincy, Keokuk, Burlington and Galesburg, and all lines of road centering in these cities. The Toledo, Wabash & Western R. R. here crosses the Chicago, Burlington & Quincy R. R., and the Toledo, Peoria & Warsaw crosses the same four miles from the town. The town is healthy, quiet and moral, licenses no liquor traffic, and is free from many of the temptations

to vice found in the larger cities. The surrounding country is of unsurpassed beauty, fertility and healthfulness. THE COLLEGE BUILDING, recently completed, stands upon a gentle eminence near the town, and commands a very extended and picturesque view. It is a large, beautiful and substantial structure, and is built after the most approved modern plans.
